

Going Back to the Island

Inter-island migration breakdown for the years 2000 - 2010

Guide to migration plot

The path thickness represents the number of people migrating between islands. The color of the line indicates which island has more emigration.

In the example to the right, there are more people leaving from **Abaco** to **Other Islands** than there are people arriving to **Abaco** from **Other Islands**.

Similarly, there are more people arriving to **Abaco** from **Grand Bahama** than there are people leaving from **Abaco** to **Grand Bahama**.
